

What is the E-board?

E-board is a reinforced insulation board consisting of extruded polystyrene foam (XPS insulation foam board) laminated to a polypropylene sheet facer. The Extruded polystyrene foam board has the properties of water-resistance and high thermal insulation.

The facing material is a twin-wall Polypropylene sheet. It is a strong and moisture resistance material and is coated with woven-rovings which allow the application of various finish materials including tiles and wall paper.

Thickness : 13mm; 23mm; 33mm & 43mm (other thicknesses may be ordered on Indent)

Width : 900mm

Length : 1800mm (2400mm available on indent)

Advantages of E-Board

- High Thermal Insulation and preventing condensation on walls
- High Compressive strength compared to similar materials
- Closed cell structure means no water or humidity absorption
- Safe to use
- Easy to cut with a knife or saw
- Boards are light enough to be carried and installed by one person.
- Soundproofing properties

Application

Block/brick surface, Tile fixing, etc

Balcony wall

Bathroom wall

back of inbuilt furniture
